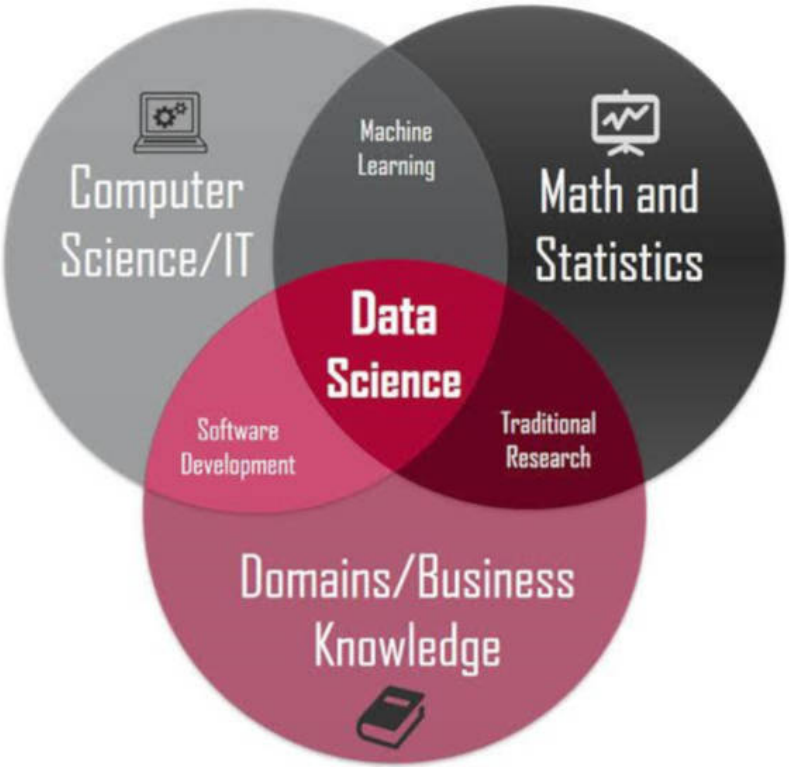
Data Science Club



What's in this issue

Kickoff Info

What to lookforward?

Welcome!

Here is our first newsletter of the semester! Hope everyone is doing well during this special year and we are glad you joined the Data Science Club!

Our Kickoff meeting will happen on **September 16, 2020 6pm CST** (this Wednesday, mark your calendar!)
Zoom link: https://uwmadison.zoom.us/j/95565304409
We will first give a brief introduction to the Data Science Club and our new executive board members. **What's exciting?** Well, Kristopher Keipert from **NVIDIA** will give a workshop on **Introduction to Data Science**! And for that, you will need to have Python Jupyter Notebook installed.
Here's some useful link for installing Jupyter Notebook on Macbook and Windows.

This semester, we will have:
- two more workshops given by **NVIDIA**
- a **resume** workshop
- a student **mixer** with Statistics Club, Economics Club
- (likely) a workshop by **UW professor**

Information regarding future events will be included in our upcoming newsletters. We hope to see you all there!

We are trying to find the best time for our weekly meeting.
Please fill out this **Google Form** to help us decide!
